

belekttron

THE VALUE OF YOUR EMISSIONS

Belektron briefly

- one of the largest specialized global carbon trading companies
- wide global network of business partners
- established trading lines with major European banks, electric utilities, carbon traders and airlines
- full membership of ICE and EEX exchanges
- bidding winner of World Bank's 2nd and 3rd PAF auctions
- carbon market professional experience from its beginnings
- impeccable track record with quick and secure settlement
- regulated under MiFID II

The Carbon market

Since 2005 European Union Emission Trading System has evolved into a leading global company-level “cap-and-trade” market of allowances for emitting carbon dioxide and other greenhouse gases with yearly global market size estimated at around 41 billion EUR in 2017. In conjunction with flexible UN, sponsored CDM and JI mechanisms EU ETS proved itself as a key instrument for reducing greenhouse gas emissions cost-effectively and driving the shift toward the low-carbon economy of the future. The EU ETS is now in its third phase with auctioning as its prevailing method of allocating emission allowances.

Carbon market offers a range of attractive business opportunities for companies involved. In current environment, many compliance companies will need to buy EUAs and EUAAs in the

market. Belektron has direct access to primary auctions and all major carbon trading venues enabling us to offer most competitive prices to our counterparties. EU ETS compliance companies can still make money by selling surplus EUAs or EUAAs or by swapping them for lower-priced CERs. Besides that, carbon market offers numerous more complex trading opportunities for everyone involved.

Belektron’s dedicated team of experienced professionals is a part of this successful story from its early beginnings and has positioned itself as a bridge between EU ETS compliance companies, project developers and liquid carbon markets. We are one of the leading independent carbon trading companies in the international carbon markets.

Our figures

- Traded volumes/allowances

- Spot sales

Our business

- buy and sell EUAs, EUAAs, CERs (all types) on spot and forward basis
- buy EUAs and EUAAs in primary auctions
- swap trades (EUAs/EUAAs/CERs)
